FULL STACK DEVELOPER

<https://github.com/darianaren/>

My path in the world of programming began in October 2022. I was fascinated with this new experience and with how much I have learned in such a short time. I am looking for challenging and motivating opportunities that will allow me to further develop my skills and knowledge in this area.

PERSONAL PROJECTS

My Cookbook Website

<https://github.com/darianaren/my-cookbook>

December 2022

Individual project for the *Soy Henry*. It consists of an application with user authentication and authorization; it allows you to view, create, modify and delete your own recipes, as well as view and save other users' recipes.

KEY ACCOMPLISHMENTS

- Develop a single page application (SPA) using the PERN stack.
- Call the data from an external API.
- Create relational databases.
- RESTful API.
- Searching by name and combined filtering.
- Controlled and optimized form.
- Apply styles using CSS Modules.

Tech Stack: JavaScript, HTML5, CSS3, React, React Redux, React Router, Node JS, Express, PostgreSQL, Sequelize.

Work Match Website

<https://work-match-client.vercel.app/>

February 2023

Group project for the *Soy Henry*. Work Match is an application designed with the intention of providing users with the ability to find or offer temporary jobs. These jobs must be completed successfully in less than 8 hours and in person, for example: mowing lawns, washing cars, walking dogs, cleaning houses, among many others.

KEY ACCOMPLISHMENTS

- Develop a single page application (SPA) using the PERN stack.
- Call the data from an API.
- Create relational databases.
- RESTful API.
- Integrated third party authentication and authorization.
- Payment gateway.
- Data storage in the cloud.
- Local storage/persist.
- Email notifications.
- Logical deletion.
- Searching by name and combined filtering.
- Controlled and optimized form.
- Apply styles using CSS Modules.

Tech Stack: JavaScript, HTML5, CSS, React, Node JS, Express, PostgreSQL, Sequelize, Cloudinary, Auth0, Stripe, Nodemailer, GitHub, GitFlow, Scrum, Figma, Jira.

KNOWLEDGE

Javascript	TypeScript	HTML	CSS	React
Redux	Angular	Next JS	Node JS	Express
SQL	PostgreSQL	Sequelize	MongoDB	Bootstrap
Sass	Cloudinary	Git	Figma	Docker

SOFT SKILLS

- Leadership.
- Teamwork.
- Self-taught.
- Time management.
- Communication and active listening.
- SCRUM Methodology.
- Problem solving and conflict resolution.
- Adaptation to change.

OTHER EXPERIENCES

Henry Hero

December 2022 - February 2023

It is a program of Soy Henry that consists mainly of teaching the essential topics to those students who are taking their first steps in programming and want to be part of the Henry's community. As well as, to solve their doubts and concerns, to inspire confidence and provide support in this new stage.

Illustration design

Design and creation of digital illustrations for books.
